Product description

The profiles of the Z8 series are weight-optimised profiles in cross-sections of 40x40, 40x80 and 80x80. The profile grooves are freely accessible or hidden under a flush smooth outer surface. If necessary, the cover can be easily opened and removed for the shoring of connecting elements or for the attachment of accessories. The sharp-edged geometry of the profile outer edge results in a smooth transition in the profile joint. The grooves and the core holes of the Z8 profiles are designed for M8 screws.

Delivery length 6030 mm
