

Cover Profile 8 40-2-90, natural

Product number PI-1555 SN6000
Weight 2.562kg
Length 6000mm

Product description

The cover profile is used to fix panel elements with a thickness of 2 mm. With the clamping profile, a quick and uncomplicated exchange of the panel elements is possible. The panel elements are inserted from the front with the cover profile. These are pressed onto the profiles and clamp the panel elements in the profile grooves.
