- 4 spindle lifting columns 45x45
- 1x control unit 1x power cable 3m
- 1x cable remote control with memory function
- 2x integrated cable duct 40x40 K

For optimal positioning of materials and tools during assembly, the work table is equipped with a matching table attachment with outrigger. The height and reach of the outrigger are infinitely adjustable. The outrigger is used to attach lights and runners. The electric height adjustment allows a flexible working posture adapted to the respective user. The memory function makes the height adjustment easy to operate. The work table is supplied pre-assembled in individual segments for complete assembly.

Height adjustment	electric
Load capacity	400 Kg
Frame height	720 mm - 1020 mm
Stroke	300 mm

A 3D rendering of a modern, minimalist desk. The desk has a light-colored wooden top and a silver metal frame. A large, adjustable, and foldable backrest is attached to the frame, allowing it to be positioned at various angles. The desk is shown in a folded position, with the backrest folded down behind the desk top. The entire unit is set against a plain white background.
